PROFESSIONAL SUMMARY

Network Engineer with 5+ years designing, implementing, and troubleshooting enterprise routing, switching, firewall, VLAN, and wireless infrastructure across multi-site environments. Deep Cisco routing/switching (IOS/IOS-XE, Catalyst, Nexus 5K/7K/9K, ASR 9000) with OSPF/BGP/EIGRP, VXLAN EVPN / ACI leaf-spine fabrics, Palo Alto and Cisco ASA edge security, F5 load balancing, AWS VPC networking, and practical automation with Ansible and Terraform. CCNP/CCNA certified; known for calm, methodical incident handling.

TECHNICAL SKILLS

- Cisco platforms: IOS / IOS-XE, Catalyst 2960/3560/3750/3850/4500/6500, Nexus 5K/7K/9K, ASR 9000
- Routing: OSPF, EIGRP, BGP, DMVPN, GRE tunnels, MPLS, route redistribution, route-maps
- Layer 2: 802.1Q trunking, VLAN design, STP / RSTP / PVST+, inter-VLAN routing (SVI), EtherChannel, LACP/PAgP
- Firewalls & security: Palo Alto, Cisco ASA, ACLs, NAT/PAT, IPsec & SSL VPN, AAA (RADIUS/TACACS+)
- Load balancing: F5 BIG-IP LTM/GTM, virtual servers, pools & monitors, SSL offload
- Cloud: AWS VPC, subnets & routing, Security Groups, NACLs, Route 53 DNS failover
- Automation: Ansible playbooks, Terraform, Cisco DNA Center
- Data center: Cisco ACI fabric, APIC controller, leaf-spine, VXLAN EVPN
- Monitoring: SolarWinds NPM, Grafana, Wireshark, SNMP, Syslog, SPAN/RSPAN
- IPAM & virtualization: Infoblox DDI, VMware NSX
- Wireless: enterprise WLAN design & troubleshooting

PROFESSIONAL EXPERIENCE

Sr. Network Engineer | Stellar Services Inc, New York, NY

Mar 2025 - Present

- Own day-to-day LAN/WAN/WLAN operations (Layers 1-3) across the enterprise in a Cisco-heavy environment (Catalyst, Nexus).
- Configure and tune VLANs, trunks, STP/RSTP, EtherChannel, and inter-VLAN routing; run multi-area OSPF and BGP with redistribution and route-maps.
- Harden edge security: ACLs, NAT, site-to-site and remote-access VPNs; deploy and tune Palo Alto firewalls; review rulebases with Nessus scans.
- Automate with Ansible (OSPF rollouts) and Terraform (data-center builds); monitor via SolarWinds NPM and Grafana dashboards.
- Manage AWS Security Groups/NACLs and Route 53 DNS failover tied to BGP WAN failover; IPAM with Infoblox; VMware NSX virtualization.

Network Engineer | Fiserv, Alpharetta, GA

Feb 2024 - Jan 2025

- Operated core and data-center gear (Cisco ASR 9000, Nexus): VLAN moves, IOS upgrades, redundancy, migration cleanup.
- Ran OSPF/BGP/EIGRP (IPv4/IPv6), HSRP high availability, and LACP/bundled Ethernet across enterprise links.
- Built site-to-site IPsec VPNs and NAT rules; drove firewall policy changes and firewall/LB config tuning from traffic-flow analysis.
- Tier-3 escalation for LAN/WAN/wireless issues; packet and flow analysis; maintained IP records and network diagrams.

Network Engineer | Amity IT Solutions, Hyderabad, India

Jan 2020 - Jul 2023

- Deployed OSPF/EIGRP routing across LAN/WAN segments; VLANs, trunking, spanning-tree, and Layer-2 segmentation.
- Set up VPN access and authentication for staff/vendors; tuned ACLs for least-privilege access.
- Monitored interface/CPU/error counters; led new-site switch/router bring-up and go-live support.

EDUCATION

Masters in Information Technology Management | St. Francis College

Jan 2024 - Dec 2025

CERTIFICATIONS

Cisco Certified Network Professional (CCNP) | Cisco Certified Network Associate (CCNA) | CCNA 200-301 Network Fundamentals — Simplilearn SkillUP (Oct 2026)

PROJECTS

- AWS Cloud Network Architecture & Security: designed secure multi-AZ VPC with public/private subnets, IGW/NAT Gateway, layered Security Groups; automated with Terraform, cutting deployment time ~50%.
- Enterprise Network Design (Cisco): simulated multi-branch topology in Packet Tracer; OSPF internal routing, BGP WAN connectivity, Wireshark traffic validation.
